

Roon DLNA Configuration Mac / PC

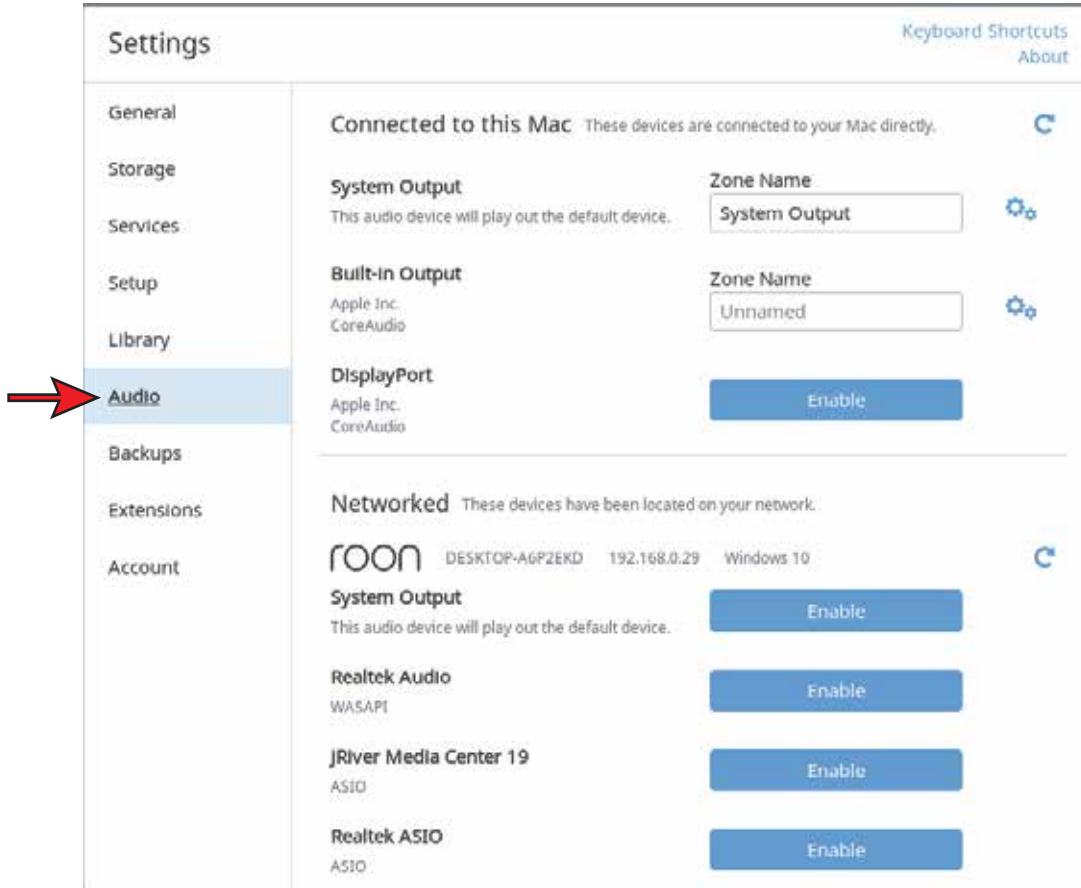

1. Launch Roon and select the menu icon from the top left of the app window.

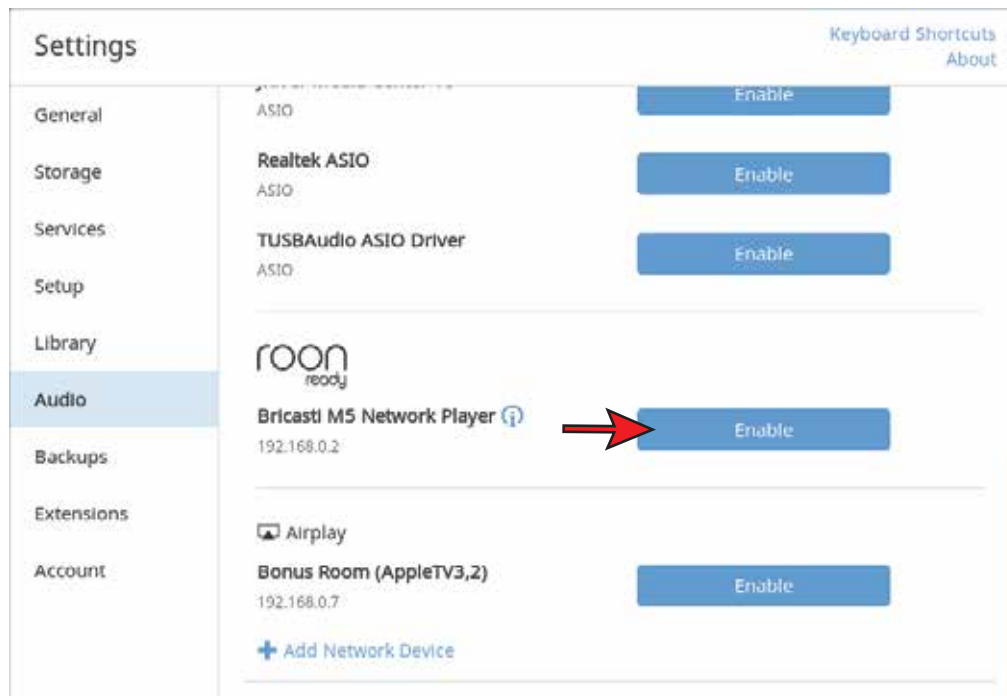

2. Navigate from the top menu to "Settings."

3. From the settings menu select “Audio” and navigate to the “networked” devices.

4. Near the bottom of the “networked” section find and enable the Bricasti Network Player.

5. From the bottom right corner of Roon you can now select the network player as a “zone” to play to. Once you have selected the the workplayer your set-up is complete.
